Hello Anne,

I do not know what the glitch was, but I went to the TCEQ central registry website, typed in "Chaparral Steel", clicked on the CN for Chaparral Steel Midlothian, Clicked on the RN (there was only one choice). The next screen gives the list of permits. Chaparral's storm water Permit is TXR05U015 and permit status is "Active." Below is the TCEQ page that pops up when you click on the permit number. [The second storm water permit for the site is held by Harsco Corp, which operates an operation at Chaparral's site.]

Let me know if you have any other questions.

Best regards, Becky

Subject: Re: FW: Gerdau Ameristeel/Chaparral Steel Midlothian, LP

I think I may have said that I had just one more question, but yet I have at least one more on top of that (my apologies). I searched the TCEQ's database for general permits, www.5tceq.state.tx.us/wq, to find your specific permit number under the general permit TXR050000. The database shows that Chaparral's Steel's specific permit under the stormwater general permit expired in 2006. Thinking I had made an error, I contacted TCEQ. TCEQ does not show that you have a current authorization under the general permit. I am sure that you have an easy explanation, and I look forward to hearing it and resolving this issue.

Thank you,

Anne Foster
Assistant Regional Counsel
